- Work on Wifi and 3G
- Integrate Youtube, Facebook and Twitter
- Include a PDF iPhone Reader

Thanks for purchase iRadio for iPhone !

If you need help on installing Xcode and getting an iOS Development environment setup, you can check out this tutorial by Alex Eckermann at Mobiletuts+:

<http://mobile.tutsplus.com/tutorials/iphone/install-xcode/>

1 - Open project :

Go on folder "iRadio V2.4" then open the file "iPhone-Radio.xcodeproj" with Xcode

2 - Configuration of the stream Radio or Podcast

In Xcode edit "MainViewController.m" and change the link (in red) line 26 "http://s1.streammonster.com:8220/listen.pls" to your own link (Radio online streaming link), save the file and you can build and go with Xcode and your app will play the radio streaming.

```
// Implement viewDidLoad to do additional setup after loading the view, typically from a nib.
- (void)viewDidLoad {
    [super viewDidLoad];

    ///////////////////////////////////////////////////
    /////////////////////////////////////////////////// Here change the link ///////////////////////////////////////////////////
    [Facebook loadRequest:[NSURLRequest requestWithURL:[NSURL URLWithString:@"http://www.facebook.com/"]]];
    ///////////////////////////////////////////////////
    ///////////////////////////////////////////////////
```

3 - Change the icon

To change the icon, create an image with the size of 57x57px and name it "icon.png"

On Xcode and go to the folder "images" and delete the actual "icon.png", then drag your own "icon.png" file into this same folder.

4 - Rename the App

To rename the app in Xcode go on the top bar select "Project" then "Rename...."

5 - Change the Splash Screen

To change the image of the Splash Screen on Xcode replace the image "Default.png" on the folder. You have to keep the same name "Default.png"

6 - Change the design of the main View

To change the design of the main view go on Resources folder on Xcode and double click the file Main-View.xib, you will directly go to InterfaceBuilder and you can edit images and text of the main view.

7 - Change the design of About us page

To change the design of the About us page go on Resources folder on Xcode and double click the file MainView.xib, you will go directly to InterfaceBuilder and you can edit images and text of the About us page.

8 - Change the design of Youtube page

In Xcode edit "YoutubeViewController.m" and change the link (in red) line 22, like this "http://www.youtube.com/" to your own Youtube link, save the file and you can build and go with Xcode

9 - Change the design of Twitter page

In Xcode edit "TwitterViewController.m" and change the link (in red) line 21, like this "http://twitter.com/" to your own Twitter account link, save the file and you can build and go with Xcode

10 - Change the design of Facebook page

In Xcode edit "FacebookViewController.m" and change the link (in red) line 22, like this "http://www.facebook.com/" to your own Facebook link, save the file and you can build and go with Xcode

11 - Change the PDF file

In Xcode edit "PdfViewController.m" and change pdf name (in red) line 24, like this "iRadio" to your own PDF file name, drag your PDF files into Xcode project then save the file and you can build and go with Xcode.

If you need support you can contact me to my email b.cortes@ingravitymedia.com , I am also available if you need any customization or App for iPhone.

Enjoy !
